ENERGY MANAGEMENT SYSTEMS

INTERNAL AUDITOR

Course aim and objectives: The course provides participants with the knowledge and tools for becoming qualified to audit an energy management system based on ISO 50001:2018 international standard integrated with safety management system. Focused attention is targeted on the development, implementation, and completion of the audit process for continual improvements of the energy management system. The audit process is a critical assessment factor relevant to consumption and effective saving methodologies for optimization of energy efficiency and energy management

Course main elements:
- Overview of ISO 50001:2018 scope and terms
- Energy management systems and auditor skills
- Audit stages, audit risks with reference to ISO 19011 auditing guidelines
- Preparing and reviewing the audit program
- Planning, conducting, reporting and follow up audit verification
- Audit investigation and communication techniques
- Non-conformity identification and handling
- Practical workshops, exercises, and final examination

Course participation: The course is open to shipping company safety, quality and environmental managers, designated persons, company internal audit team and shipboard team members involved in the audit process

Course duration: 2 days This training is provided with real time instruction through zoom platform in two pre-scheduled interactive learning sessions

Course Schedule: 10:00 - 17:00 hours daily
