

## BEHAVIORAL BASED SAFETY

**Course aim and objectives:** Behavior Based Safety (BBS) is an approach to safety which focuses on employees' behavior as the contributing factor, based on statistics, of most work-related injuries and incidents. Moreover, "at risk" behaviors are the least measurable and observable events before workplace injuries take place. Participants will have the opportunity to develop new skills on Behavior Based Safety for a systematic approach motivating safer behavior thus improving safety performance in the workplace environment which can also influence culture, in line with the use of the latest technological advances applicable to the maritime industry.

### Course main elements:

- BBS principles, pattern and structure
- BBS process with application to shipping
- Contributing factors to work related injuries
- Determining decision, skill-based and perceptual errors
- Conditions and practices of shipping operators
- Actions taken to reduce human error
- Resource management techniques enhancing BBS
- Strategies for implementing the BBS process
- Seafarers' involvement in the BBS process
