

ISO 45001:2018

Occupational Health & Safety Management Systems Awareness

Course aim and objectives: This course provides participants with a detailed analysis of the elements of the standard which can complement the ISM Code - safety management system by further promoting safety to the marine workplace environment. Occupational health and safety management systems provide a tool for reduction of risk related issues and safer ship operations as well as opportunities for continual improvement

Course main elements:

- ISO 45001:2018 terms and scope
- Occupational health and safety management system requirements
- Integration with ISM Code – safety management systems
- Risks and opportunities for improvement
- Operational planning, knowledge of the organization, performance evaluation
- Management review and continual improvement
- Practical exercises and final examination

Course participation: The course is open to shipping company office personnel and shipboard members who need to understand and implement an occupational health and safety management system

Course duration: **1 day** This training program is currently provided in 6-hours with real time instruction through zoom platform in a pre-scheduled interactive learning session

Course Schedule: 10:00 – 17:00 hours daily (including 30 minutes additional time daily for Q & A and completion of classwork)
