

PORT STATE CONTROL INSPECTIONS AND VESSEL TARGETTING PROCESS

Course aim and objectives: This course provides participants with knowledge for understanding the Port State Control inspection criteria and MOU regimes to ensure ships are compliant with IMO's international regulatory requirements. The course provides guidance for managing and preparing for Port State Control inspections and outlines the strategies supporting ship operators and safeguarding the ongoing trading of the ship

Course main elements:

- Background and introduction to Port State Control regime
- Scope of PSC inspections and MOUs
- Targeting of ships for inspection
- PSC types of inspection
- Preparation and management of the PSC inspection
- Findings leading to grounds for detention
- Proactive ship-management reducing the risk for detention
- Class related detention items and corrective actions
- PSC detention consequences and ship-manager appeal process
- Practical exercises and final examination

Course participation: The course is open to shipping company operations, technical, DPAs, quality, safety managers, fleet superintendents, masters, and shipboard officers

Course duration: 2 days This training is provided with real time instruction through zoom platform in two pre-scheduled interactive learning sessions

Course Schedule: 10:00 – 17:00 hours daily
