

MARITIME RISK ASSESSMENT

INCIDENT INVESTIGATION & ROOT CAUSE ANALYSIS

Course aim and objectives: This course provides participants with knowledge for effective management of marine related risks affecting operational safety of vessels as a tool for identifying the necessary steps and controls to eliminate root cause(s) and other factors contributing to marine incidents. Proactive risk assessment process is an essential element for mitigating losses by preventing the occurrence of incidents and enhancing operational efficiency. Course participants will also have the opportunity to go over various methodologies for tracing and identifying the causes during an incident investigation process with reference to maritime industry best practice guidance and IMO Model Course 3.11

Course main elements:

- Scope and principles of the maritime risk assessment process
- Methodologies for proactive management of risks and mitigation of losses
- The Bow Tie methodology
- Step by step analysis and practice of the incident investigation process
- Factors contributing to incidents
- Incident investigation process and analysis of causes
- Root cause analysis and action(s) to eliminate causes
- Lessons learnt, proactive and reactive risk assessment
- Immediate, medium, and long-term corrective actions
- Practical exercises and final examination

Course participation: The course is open to shipping company managers, superintendents, masters, and senior shipboard team members involved in risk assessment process and in the incident investigation process

Course duration: 2 days This training is provided with real time instruction through zoom platform in two pre-scheduled interactive learning sessions
