

ISO 50001: 2018

ENERGY MANAGEMENT SYSTEMS

Course aim and objectives:

The ISO 50001:2018 energy management international standard promotes shipping company energy efficiency standards above and beyond minimum compliance. Integration and implementation of the provisions of the standard's requirements through the company's marine management system procedures complements the company's energy efficiency processes. This course provides participants with the knowledge and methodology for continual improvement by implementing an energy management system.

Course main elements:

- ISO 50001:2018 scope, terms and structure
- Energy management system requirements
- Compatibility with ISO 14001:2015
- Integration in marine management systems and certification process
- Practical exercises and final examination

Course participation:

The course is open to shipping company top management, safety, quality and environmental managers, superintendents, shipboard designated team of officers.

Course duration: 1 day

This training program is currently provided in 6-hours with real time instruction through a dedicated e-platform in 2 three-hour pre-scheduled interactive web-based learning sessions.
